

TENT-IT

A Guide to Marquee Flooring

MARQUEE FLOORING

The flooring is the most important part of any marquee. Just like in a building, the flooring cannot slope or be uneven. All furniture, glasses and guests are effected by a level surface or a lack of. At TENT-IT we have the flooring for most sites and budgets.

Ground condition

Floor Type

Level, very slight slope

All flooring types

Medium slope / Uneven ground

Suspended steel wooden flooring

Uneaven ground

Suspended steel wooden flooring

Pine wooden flooring

Our Pine wooden flooring is a direct lay type of flooring, meaning it is set straight on the ground and levelled out with packers.

Pine is a step up from our plywood flooring while not needing carpet, its perfect for any upscale event.

Fully natural pine flooring is renewable. each board sanded and varnished every season to keep them looking newer for longer.

Steel sub base floor

Our highest quality finish floor consists of a steel frame first levelled out with packers and finished with varnished pine.

This forms a solid base for any type of events

Flooring Guide

- Fit for uneven sites
- Kerbs & undulations can be levelled out
- High quality finish
- No further covering necessary but compatible with carpet

Direct lay Plywood flooring

A basic and cost effective solution for most ground types excluding sand. This flooring is made in house and is varnished during the off season.

Can cover slight even slopes and undulating ground and sits directly on the ground. Can be used in conjunction with carpet & Dance floors.

Flooring Guide

- **Cost effective**
- **Quick to lay**
- **Renewable**
- **All marquee sizes**

Interlocking Plastic Flooring

Interlocking plastic flooring is our entry level ground protection flooring, can be used within marquees or outside for walkways.

Drains water well and does not damage grass, even after 10 days.

Flooring Guide

- Suitable for light foot traffic
- Protects grass
- Cost effective
- Quick to lay
